DETAILED ACTION

Election/Restrictions

Claims 1-22 directed to a process for fabricating an integrated circuit structure are restricted as follows:

This application contains claims 1-22 directed to the following patentably distinct species of the claimed invention:

- Group I (Claims 1-17): A process for fabricating an integrated circuit structure including the step of forming insulating material on the inwardly-facing surface of at least the first and the third doped regions in the window, as disclosed in Figs. 1-18.

- Group II (Claims 18-22): A process for fabricating an integrated circuit structure including the steps: forming a second insulating surface adjacent the third doped region and extending toward the center of the window; and forming a conductive plug in the remaining open volume of the window, wherein a portion of the plug is in electrical contact with the second doped region on the surface of the second doped region facing the center of the window, as disclosed in Figs. 19-28.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of claim is generic.

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 2814

remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
